MOBILE & ELITE SUITES

MOBILE SUITES

The Mobile Suites is the foundation of DRV. It offers the comforts of home, including the conveniences of a residential kitchen and the peace of mind that comes from knowing you've chosen the best construction available.

Latte with Providence Décor
and Cashmere Furniture

41RKS B4

Engineered for dependability and lasting beauty, your Mobile Suite will be every bit as sophisticated as you are. Each floor plan features a gourmet kitchen that includes ample storage.

41RKSB4

The 41RKSB4 features a grand staircase that leads to the master bedroom, bathroom, linen cabinet, and large washer/dryer closet. The dedicated laundry area allows for multipurpose storage and workspace.

Shown with optional headboard upgrade.

MOBILE SUITES

The 44 Nashville features the largest front living room in the industry, made to comfortably accommodate eight people. Whether entertaining with friends and family or relaxing alone, this floor plan welcomes you home.

Hazelnut with Providence Décor
and Slate Furniture

The 44 Nashville showcases a gourmet kitchen with upgraded amenities that include a black stainless steel residential refrigerator with matching convection oven. *Shown with optional hardwood valances.*

drvsuites.com . 7

44 NASHVILLE

44 NASHVILLE

The bath and a half floor plan features a full height bed slide and wardrobe slide to maximize your storage and floor space. The large private bath, placed in the back of the unit, allows for tall ceilings, which gives additional storage and a spacious shower with plenty of head room.

MOBILE SUITES

Every model features a 20 cubic foot residential refrigerator, stainless steel dishwasher, convection microwave, soft-close drawer guides, hand laid luxury vinyl plank flooring, and a custom tile backsplash on solid surface countertops.

Latte with Moonstone Décor
and Slate Furniture

Shown with optional features.

40KSSB4

40KSSB4

The 40KSSB4 is perfect for entertaining or prepping with a large, uninterrupted kitchen island. It also features an off door hallway that allows access to the bathroom and residential refrigerator without opening slideouts.

FEATURES & BENEFITS

From the ground up, all units are built with automotive style components. Our innovative designs make it easier to transport, set up and maintain your unit.

STRUCTURE

Professionally designed and tested 15" triple steel box tube chassis. Super strong foundation to build a lasting, high quality fifth wheel.

All-weather heavy duty aluminum floor system. The floor is screwed and bolted together and will not rot over time. Also, we do not use staples which eventually work up through the floor covering.

R-29 insulated frame floor system with three weather barriers. Warm floors for extended or full time use: and keeps out condensation.

TECHNOLOGY

New state of the art Level-Up™ leveling system and industrial hydraulic system. Level your coach with a push of a button.

New automotive style Kodiak® disc brakes. Limited lifetime warranty; smoother stopping; shorter stopping distance; low maintenance cost.

Heavy duty Goodyear® H-rated 17.5" tires and aluminum eight bolt wheels. Heavier load capacity. Special tread pattern to dissipate heat. Tires are regroovable for miles and miles of safe use. Wheels are light weight and will not rust.

SeeLevel tank monitoring system. Uses sonar to provide instant and accurate readings of all tanks.

STURDY

Screwed and glued construction. Solid; 16" o.c. stud spacing.

3.25" aluminum framed walls with R-16 insulated rating. Exclusive foam core vapor barrier. Lightweight; lower heating and cooling cost; noise reduction; eliminates chance of condensation.

Radiused aluminum roof rafters on 16" centers. More space; more insulation; improved water run off; maximum load capacity per square foot.

R-25 insulated roof system with plywood and rubber or fiberglass covering. Improved weather barrier; sound deadening; low maintenance; lower heating and cooling costs.

Soft touch interior ceiling. Sound proofing; easy to clean; extra insulation.

REFINED

Conveniently located wall switches control all lighting. Fingertip control of all task and decorative lighting.

Overhead LED room lighting on dimmer switches. Personal light control.

Designer raised panel cabinet doors and soft close drawers. Optimal storage; residential look; residential function.

CONSTRUCTED FOR FULL TIME LIVING

RELIABILITY

- High pressure hydraulic lines with metal fittings
- Individual push button slide room controls
- Industrial stabilizer jacks located and wind tested to provide maximum stability
- Heavy gauge UL copper wiring
- Residential copper water manifold
- Reliable LED lights
- Convenient lights at all exterior service locations
- Gel coat fiberglass walls and exterior doors
- Plywood roof decking
- Extra sound proofing in floor, walls and roof
- Ultra quiet ducted lo-pro A/Cs
- Automotive disc brakes
- Furnace return air replaceable filter
- Over size basement storage doors with gas lift cylinders
- Custom painted exterior graphics
- Tough skin special coated rock guard.

NOTE: Some features shown are exclusive to specific makes and models. Please review the complete Standards and Options list for availability.

DRV ADVANTAGES

Stacked triple-tube steel frame for 15" of maximum strength; the largest foundation on any fifth wheel in the industry.

Pinless hydraulic jacks are mounted at a 5-degree angle for maximum stability.

Commercial hydraulic rack & pinion slide-outs. All gear boxes are located inside the frame for the ultimate weather protection.

Heavy-duty 17.5" Goodyear® tires provide increased load capacity while staying cool on long hauls. We use truck tires, not RV tires, to ensure better performance and peace of mind.

Commercial E-Z Lube® hubs surrounded by 8 large 5/8" stud bolts and standard automotive disc brakes round out the safety features of every DRV unit.

Residentially-hung sidewalls are carriage-bolted into the floor for solid construction and superior strength.

BOX STEEL SOLID

The foundation is the most important part of your home. It needs to be strong, reliable, and able to last the tests of time. DRV's custom-engineered 15" triple box tube frame measures 101" wide – the largest, most rigid fifth wheel frame in the industry. This design eliminates flex around the pin box, and allows us to frame even the upper deck with steel to open up the storage compartment, providing you with space to fit all your personal belongings.

DRV 6-JACK LEVEL-UP SYSTEM

Designed by DRV, our 6-jack level-up system provides quick and easy leveling and the strength to stabilize the coach when set up.

Our 3 1/4" walls are the thickest in the industry, giving you maximum insulation from noise and weather. The exclusive foam core vapor barrier eliminates condensation.

Formaldehyde Free! High-density wool R-16 residential insulation completely surrounds all of our walls and slides. Best insulation in the industry and eco-friendly!

A copper water manifold comes standard, ensuring equal water pressure throughout your home. And each water line is clearly labeled and has its own shut-off valve, allowing you to isolate a single line without shutting off water to the rest of your home.

MORryde® I.S. Suspension eliminates the axle and leaf springs, allowing each tire to work independently. With 5 1/2" of travel per assembly, MORryde® I.S. will absorb road shock and protect your home for its lifetime.
